REMARKS/ARGUMENTS

In response to the Examiner's Advisory Action dated 17 February 2006 where the Examiner requests a further amendment clarifying the synchronization and signaling fields, Applicants file herewith amendment and Request for Continued Examination. As such, Applicants have amended Claim 1 to require that "wherein the field is the synchronization field in a first burst of the plurality of bursts in a superframe and the field is the signaling field in a remainder of the plurality of bursts in the superframe."

Applicants believe that the claims as amended overcome the Examiner's rejection of Claim 1. Applicants pray that an early notice of allowance will issue.

If there any other issues that need to be addressed, the examiner is asked to telephone Applicants' undersigned attorney.

Respectfully submitted,
